

# JEWELRY

2024/2025

WEMPE

*There are special places to which we are deeply connected, and which are full of memories. When we return to these places, forgotten moments come to life. We walk along the familiar paths and listen to the sounds with a smile, because they still sound exactly the same as before. The house walls warmed by the sun tell old stories, flowering bushes spread their familiar perfume, and we perceive nature and everything around us with all of our senses.*

*Our jewelry interweaves the beauty of external and internal worlds, because our memories and feelings manifest themselves in it and are thus made palpable.*

*I wish you pleasant reading as you discover our jewelry creations of 2024.*

*Sincerely, Kim-Eva Wempe*

# *The Beauty of Nature*

### A HIGH-CARAT SOLOIST

A solitaire is more than a piece of jewelry—it’s a symbol of love and constancy. Its name is derived from the French adjective *solitaire*, or “standing alone”, which refers to the position of the single diamond at the center of a piece of jewelry. But our solitaires owe their sparkle not only to their symbolic power—they also attest to our expertise. That’s because a diamond has unique properties that have developed over the course of its natural evolution. The quality of a diamond is tested and certified according to international criteria such as carat, color, clarity, and cut.

WEMPE-CUT®

INCOMPARABLE BEAUTY

Diamonds have been coveted since time immemorial, because they symbolize eternity and preserve the special moments of our lives. That's why we've created something whose beauty is perfect and unique: our Wempe-Cut®. We conceived this patented diamond cut through our love of fine craftsmanship and the synergy of technology and design. Like no other diamond cut, its 137 facets ignite a spectacular fire and transform light into brilliance.

## UNIQUE: ONE FOR ALL

It's almost like magic: a ring whose size can be varied at will. But with the Multisize ring, that can be done with a mere twist of the wrist. Thanks to a refined technology, the ring can be easily pulled apart and pushed together again. Whatever design you choose, and whether you're a man or a woman, it really fits every finger.

# *Natural* Radianance

*Memories are like dear friends to whom we feel a close connection. When we meet certain people or visit places from the past, memories immediately come to life again. Our pieces of BY KIM jewelry have told their own story for almost a quarter of a century. BY KIM jewelry is crafted in our Wempe Atelier for people who are always seeking something new and who prize their freedom. It reflects a certain attitude toward life and is never simply a random choice.*

*Through our love for fine craftsmanship, we conceive designs that every individual can use to uniquely express his or her personality. And with each piece of jewelry, new experiences are created and memories are preserved.*
